DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The cited prior art fails to disclose, teach or suggest, at least on claim 1, a semiconductor device including "*a contact area between the contact plug and the capacitor lower electrode being greater than a contact area between each of the two capacitor upper electrodes and the ferroelectric film, and at least a part of a gate electrode of the MOS transistor being located just below a region of the contact plug, which region is in contact with the capacitor lower electrode.*"

At least on claim 12, a semiconductor device including a "*contact plug including a first plug portion formed in the interlayer insulating film and connected to one of the source and drain regions shared by the two MOS transistor, and a second plug portion formed on the first plug portion and extending from a region of contact with the first plug portion to a region above at least a part of a gate electrode of each of the two MOS transistors.*"

And at least on claim 20, a method for fabricating a semiconductor device including, "*a contact area between the contact plug and the capacitor lower electrode being greater than a contact area between each of the two capacitor upper electrodes and the ferroelectric film and a region of the contact plug, which region is in contact with the capacitor lower electrode, being located just above at least a part of a gate electrode of the MOS transistor.*"
